

Areebah Mushtaq | Software Engineer

0323-5257581

areebahmushtaq123@gmail.com

CH House, Opposite Nadir Filling Station, Sahiwal Road, Pakpattan

Profile:

A Software Engineering student at the University of Lahore (UOL), willing to convert my research ideas into fruitful results. Looking for a challenging and supportive workplace that encourages continuous learning, skill development, and achievement.

Education:

- Bachelor of Science in Software Engineering (2023-Present)
7th Semester
University of Lahore
- FSC(Pre-Medical) (2020-2022)
Punjab Group of Colleges-Pakpattan.
Secured 899/1100
- Matriculation (2018-2020)
Premier Public Girls High School-Pakpattan
Secured 1021/1100

Skills:

- **Programming Languages:** HTML, CSS, JavaScript, C++, PHP (CRUD & Laravel)
- **Frameworks & Libraries:** React, Vite, Ant Design, Zustand
- **Mobile & Backend:** Android Studio, Firebase (Authentication & Firestore)
- **Technical Tools:** Dev C++, Just in Mind, Canva, Figma, Git, GitHub, REST APIs
- **Currently Learning:** WebSockets, Design Systems
- **Soft Skills:** Strong Writing Skills, Effective Verbal Communication, Teamwork

Work Experiences:

- **Freelancer (Content Writer)** (2022-2024)
Optimized written materials for SEO standards, elevating online visibility and driving organic traffic to client platforms on Fiverr.
- **Graphic Designer** (2024-2025)
Created visually compelling designs that improved user engagement and strengthened brand recognition across digital and print media.

➤ **Frontend Development Intern — CodeAlpha**

(July – August 2026)

Building frontend tasks and UI components as part of a remote internship program.

Projects:

➤ **Cafe Management System** - C++

➤ **Campus Life Optimizer** - HTML, CSS

➤ **Property Management System** - HTML, CSS, PHP, Laravel

➤ **IVVSP Web Dashboard** - React, Vite, Ant Design, Zustand

Final Year Project - role-based routing (super admin, zone admin, officer), real-time dashboards, and live visual simulations of vehicle verification events, built against a mock auth layer.

➤ **Landscapes (Image Gallery)** - HTML, CSS, JavaScript

Cataloged gallery of Pakistan's landscapes with category filters and a lightbox viewer with keyboard and next/prev navigation.

➤ **Reckoner (Desk Calculator)** - HTML, CSS, JavaScript

Desk-calculator-styled arithmetic app with running tape, keyboard support, and real-time result display.

➤ **Collabin (Growth & User Acquisition Strategy)** - Growth Strategy, Cold Outreach

Case study for a two-sided marketplace: prioritized supply-side acquisition and designed an outreach system (DM, WhatsApp, email scripts) against a defined budget and timeline.

➤ Developed e-commerce websites using **WordPress** and **Shopify**.

➤ Worked on a project named **Car Parking System** using Uppaal Tool.
